

# SECURE APPLICATION CONNECTIVITY ANYWHERE.

Digital transformation compels application development teams to move fast, while cyber security threats require a heightened security posture.

AlgoSec lives at the intersection of your infrastructure, security policy and the applications that run your business.

Balancing between agility and security is an ongoing battle for security teams, who are often unable to keep pace. This situation creates application delivery bottlenecks, and leaves the company exposed to increasing risk and compliance violations

## The AlgoSec Security Management Platform

The AlgoSec platform helps organizations securely accelerate application delivery by automating application connectivity and security policy across the hybrid network estate, including public cloud, private cloud, containers, and on-premises networks.

## With the AlgoSec platform, application owners and InfoSec teams can:

01

Enable application visibility by providing application discovery for reliable, estate-wide mapping.

02

Ensure compliance with application compliance awareness, risk mitigation, and remediation.

03

Cut application delivery bottlenecks with intelligent application change automation.

# FIVE REASONS WHY LEADING INFOSEC TEAMS CHOOSE ALGOSEC

**Your applications  
always come first**

AlgoSec's patented application-centric view of the hybrid network abstracts infrastructure complexity by listening to the network and associating connectivity flows with specific applications.

**The only complete  
hybrid network solution**

Visualize and manage the application connectivity and security policies across all public clouds, private clouds, containers, and on-premises networks.

**Security across the entire  
application development lifecycle**

Automate security policy across the application delivery pipeline from code analysis and build, through monitoring and reporting, to mitigate risk without compromising agility.

**Zero-touch change  
automation**

Rapidly plan and execute application connectivity and security changes - all with zero-touch and orchestrated across all security groups and filtering technologies.

**Full integration with  
your existing tech-stack**

Complete integration with leading ITSM, SIEM, vulnerability scanners, identity management, and orchestration systems promotes a holistic, more robust security posture.

“ Even the application owners don't know what all the dependencies are, so you need an application-based view of connectivity and security policy, especially when you're migrating to the cloud. ”

# THE BUSINESS IMPACT

## Accelerate time-to-market without compromising security

With complete visibility of your hybrid network and zero-touch automation, your team can focus on what's essential – adding business value. AlgoSec analyzes your entire network intelligently so you can make changes quickly.

## Reduce cyber-security threats and reputational risk

Know your security posture and adapt quickly before an attack happens. AlgoSec automatically analyzes the impact of each change before it's made, so you know in advance whether you are willing to accept the risk.

## Align DevOps, SecOps, and business teams

Align your teams around the needs of the app team by ensuring that DevOps, SecOps, and business teams speak the same application-centric language. This way, projects get completed quicker and changes work as intended.

## Always be compliant

Quickly pinpoint compliance gaps so you can immediately act with audit-ready reports. Identify exactly which application or security policies are potentially non-compliant.

## Achieve continuous compliance

Always be compliant. Quickly pinpoint gaps, so you can immediately act. Identify exactly which application or security policies are potentially noncompliant with audit-ready reports.

## WHO IS ALGOSEC

AlgoSec is a global cybersecurity leader that empowers organizations to securely accelerate application delivery by automating application connectivity and security policy anywhere. The AlgoSec platform enables businesses to gain visibility, reduce risk and process changes at zero-touch across the hybrid network.

With almost two decades of leadership in Network Security Policy Management, over 1800 of the world's most complex organizations trust AlgoSec to help secure their most critical workloads.
